Problem – Solution Fit Overview:

The Problem–Solution Fit ensures that the Online Bookstore platform solves core issues faced by readers and book buyers using traditional or outdated online systems. It validates that the solution aligns with actual user needs before building full-scale features.

Purpose:

- Provide a centralized and user-friendly platform for browsing, searching, and purchasing books.
- Simplify book discovery using advanced filters and categories.
- Offer a seamless shopping experience with cart, wishlist, and user reviews.
- Support admins with easy tools to manage inventory, categories, and book listings.
- Enable fast, reliable, and secure interactions with the system.

Problem Statement:

Users face several challenges such as:

- Difficulty finding books due to poor search and filtering options.
- Limited or unreliable reviews to help make purchase decisions.
- Lack of organized categories for browsing.
- No centralized platform to wishlist or save books for later.
- Manual or inefficient stock and book management for admins.

Solution:

The Online Bookstore offers:

- A modern full-stack MERN platform for browsing, searching, and buying books.
- Smart filters (genre, price, author, rating) for easier discovery.
- Detailed book pages with descriptions, reviews, and ratings.
- Cart and wishlist features for easy, personalized book management.
- Admin panel for adding, updating, deleting books and managing inventory.
- Scalable, secure design with role-based access and token authentication.
